EDUCATIVE SEMINAR IN VETERNIK

On the 6th June 2008 in Veternik, a place near the city of Novi Sad in the Republic of Serbia, an educative seminar was held on the topic: *Multiple disability-accompanied conditions*, in organization of Hospice for children and youth with disability and the Medicine Faculty of city of Novi Sad.

The seminar was intended for all medical stuff which has direct contacts and treats children with multiple disabilities: pediatricians, physiatrists, neurologists, psychiatrists as well as all profiles of special educators and rehabilitators and psychologists.

About 70 subjects participated at the seminar, and it was spoken about:

- Prevention of delivery of children with congenital abnormalities hereditary disorder;
- Structure of motor impairments in children with intellectual disability;
- The role of the sensory integration in work with persons with multiple disability;
- The meaning of the differential diagnosis of hearing impairments, autism and autism with hearing impairments;
- Application of open Montessori programme as alternative method for persons with severe disability on the younger age;
- Education of the family of the member with multiple disability;
- Prader-Willi syndrome- problems of the accompanied symptoms;
- Integral approach in care for the persons with Lesch-Nyhan syndrome.

Representative of our state at that seminar was Dr. Vladimir Trajkovski, associate professor at the “Ss Cyril and Methodius” University-Skopje, Faculty of Philosophy-Institute of Special Education and Rehabilitation, who directed the present guests’ attention on the topic which he presented: *Physiological abnormalities in autism.*
